2. Social Media: Please share the idea or finding from your paper that you think will be most interesting to the Bank's social media follower, something that would be very interesting to a well-informed, but general audience. We would try to use this in the posts for your paper.

Your response ...

3. Are there any people in the media that you know are writing about the topics that your paper addresses that should be contacted regarding your paper?

Your response ...

4. The rest of the information needed for your paper is in the following pages. Please use the format laid out in the template.

Paper Title

3 Math

The `amsmath` package is used to set displayed mathematics

$$x^n + y^n = z^n$$

(1)
$$\Pr(Z \leq t) = \Phi\left(\frac{Z - \mu}{\sigma}\right),$$

where Z follows a $N(\mu, \sigma^2)$ distribution. Equations can be referenced by `\ref`. When $\mu = 0$ and $\sigma = 1$, the Z in equation 1 becomes a standard normal variable

Multiline equations can be presented with the `align` environment. For example,

(2)
$$g_\mu(\phi) = 0,$$

(3)
$$g_\mu(X) = 1.$$

An equation that is not referenced should not be labeled. The starred version of the equation and `align` are for this purpose.

4 Lists: enumerate, itemize, description

1. first item. Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante.
2. second item
3. third item

6 Figures

Vector graphics do not lose clarity when being scaled. Make your figure in pdf format when you first generate it and keep in mind its sizes in the article to avoid over-scaling. Do not simply convert a jpeg or png image to a pdf.
